
Project History:

The Kenya project at SSSL started in 2005 as a solution to the IB-students need for a CAS project and the struggle in Wagwe, the Kenyan home village of SSSL employees Alice Odhiambo and Hulda Palm.

There are many orphan children in the area and the need for education is endless.

The scholarship program

We started to help 2 girls with secondary education and as the project proceeded, after 2 years we had 8 students in the program.

In 2010 we formed the vision of building a nursery school and in 2011 we purchased a piece of land and started the fundraising to build the school.

In november 2012 we started the first building, and in january 2014 we opened our school, the Mama Norah Education Centre.

Meanwhile our scholarship students have all graduated and are now working and self supported.

The Mama Norah Education Centre

Our aim and vision is to build a complete primary school, that started with the mixed nursery/primary one class in 2014, which is to be complete with all 10 classes by 2020. We are also planning to have education in tailoring, carpentry and household agriculture/farming.

To be able to reach this vision we welcome everybody interested in the project to take part in the fundraising.

“No one can do everything, but everybody can do something.”

- Jan Eliasson, Vice Chairman of the United Nations.

The Kenya Project

Education for a sustainable development

Fight poverty with education!

The LIFE SAVER filter and Eco-loo toilets

To ensure that the school is environmentally sustainable and that the children get clean and safe drinking water as well as good fertiliser to the school plantation we have invested in a LIFESAVER water filter and ECO-LOO toilet units.

The Vision:

Our vision is to teach students how they can change the lives of children and young people in one of Kenya's most impoverished areas while at the same time enriching their own lives through charitable work.

CAS activities in the daily life

We are hosting a wide mix of charity events such as concerts, masai markets, flea-markets and golf-competitions in order to raise funds for the project.

Volunteer trips with students

We are hosting volunteer-trips to Wagwe. During the stay we are participating in the development of the school and are also exploring Kenyan wildlife in one of the national parks.

Join our work!

Be a part of the development of the Mama Norah Education Centre! Host a charity event, make a fundraise activity or travel with your students together with us to Kenya.
